INTERNATIONAL SEARCH REPORT

International application No.

PCT/US02/10332

Box I Observations where certain claims were found unsearchable (Continuation of Item 1 of first sheet)

This international report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. Claim Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:

2. Claim Nos.:
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
were not searched because they are improperly multiple dependent as covered by the second and third sentences of PCT rule 6.4(a).

3. Claim Nos.: 9 and 10
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box II Observations where unity of invention is lacking (Continuation of Item 2 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:
Please See Continuation Sheet

1. As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:

4. No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: In Part 1, 2, 4-8

Remark on Protest

The additional search fees were accompanied by the applicant's protest.

 No protest accompanied the payment of additional search fees.

BOX II. OBSERVATIONS WHERE UNITY OF INVENTION IS LACKING

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In order for more than one species to be examined, the appropriate additional examination fees must be paid. The species are as follows:

I. Compounds of formulae (I) or (II) where R3 represents monocyclic 6-membered ring containing only one N atom as heteroatom, pharmaceutical compositions containing these compounds and a method of using these compounds.

II. Compounds of formulae (I) or (II) where R3 represents bicyclic ring containing 2-3 N atoms as heteroatoms, pharmaceutical compositions containing these compounds and a method of using these compounds.

III. Compounds of formula (II) where R3 represents monocyclic 6-membered aryl ring, pharmaceutical compositions containing these compounds and a method of using these compounds.

IV. Compounds of formula (II) where R3 represents monocyclic 6-membered ring containing two N atoms as heteroatoms, pharmaceutical compositions containing these compounds and a method of using these compounds.

V. Compounds of formula (III), pharmaceutical compositions containing these compounds and a method of using these compounds.

The claims are deemed to correspond to the species listed above in the following manner:

Species I, II : Claims 1 and 2

Species III : Claim 2

Species V : Claim 3

The following claim(s) are generic: 4-8.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

There is no common core which in the Markush Practice, is a significant structural element shared by all of the alternatives; see PCT Administrative Instructions Annex B Part I (f) (i) (B) (1).
